Reply to Office Action of June 15, 2005

AMENDMENTS TO THE CLAIMS

1. (Original) An anchor structure for fans to fasten a fan to an installation object without

damaging the fan structure, comprising:

the fan having through holes formed on corners to engage with coupling members, each

of the coupling members including a first fastening element running through the through hole

from a rear end thereof and a second fastening element running though a front end of the

through hole to engage with the first fastening element.

2. (Original) The anchor structure for fans of claim 1, wherein the first fastening element

has an inner wall surface and the second fastening element has an outer wall surface that form

respectively a screw section corresponding to each other.

3. (Original) The anchor structure for fans of claim 1, wherein the first fastening element

has a first retaining head.

4. (Original) The anchor structure for fans of claim 1, wherein the second fastening

element has a second retaining head.

5. (Original) The anchor structure for fans of claim 1, wherein the installation object is a

power supply.

Docket No.: 2450-0552P

Reply to Office Action of June 15, 2005

6. (Original) The anchor structure for fans of claim 1, wherein the first fastening element

has a tube diameter smaller than the diameter of the through hole.

7. (Currently Amended) The anchor structure for fans of claim 16, wherein the second

fastening element has a tube diameter smaller than that of the first fastening element.

8. (Original) The anchor structure for fans of claim 4, wherein the retaining head of the

second fastening element and the installation object have respectively a retaining section

corresponding to each other.

9. (New) The anchor structure for fans of claim 1, wherein the first fastening elements are

detachably mounted in the anchor structure.

10. (New) The anchor structure for fans of claim 1, wherein the first fastening element

and second fastening element extend in a direction which is parallel to a rotational axis of the

fan.
